## Disaster Response, Recovery, and Long-Term Recovery Webinars for 2020 Oregon Wildfires

The Oregon Office of Emergency Management and FEMA are sponsoring a series of webinars to provide an overview of disaster recovery resources that can support your neighbor's recovery from the September 2020 wildfires. State Programs, FEMA Programs, and other Federal Partners will share information to help grow your community's Long-Term Recovery Group.

You are invited,  
join us!

Over the next few weeks, informational Webinars will be offered to Emergency Managers, Community Leaders, Elected Officials, and Community Members interested in helping your neighbors recover from this and future disasters. You will learn how the FEMA process works, how you can help, and where to find additional resources to assist survivors.

The webinars will be hosted by Adobe Connect. Please register at: <https://bit.ly/3hMiYWP>  
A phone number will be visible for audio purposes once you've entered the session.

We will also provide recordings of each session once it has taken place for those who were interested in the material but unable to attend at the scheduled time.
